IBM Informix Database Connector

Oracle databases

- Name: **Informix**
- Version: 1.0.0.0
- Protocol: Proprietary
- Interface: TCP/IP
- Runtime: .NET 4.8 (Windows)
- Configuration:
    - Devices / Protocols

Overview

The **IBM Informix Database** is a legacy relational database management system that was widely used in older solutions.
Due to its more limited use nowadays, the **Informix connector** is not included in the standard package.

This connector is **provided on demand**. If you require integration with Informix in your project, please contact our **technical support** so we can evaluate your case and provide the appropriate solution.
