External Solution Tag Importer

Explanation on to import tags from an External Solution Tag Importer

This import wizard makes the configuration process faster. This tool allows you to set the solution configuration like another '.dbsln' or '.tproj' file with just a few clicks. The Import Solutions feature is available at **Solution / Import Tags / Solution**.

When selecting the Import Solution icon, a dialog window will open with options to customize the import process. The following section will explain the options.
