Designer Workspace

Configuration workspace to to build and test all solution modules.

Modules **Designer** Designer Workspace | Reference

Overview

Workspace Organization

Designer is the unified configuration workspace where you build and test complete FrameworX solutions. It includes:

- **Solution Explorer** - configuration access to all modules and tools
  - **Solution** - custom solution settings, import and export tools
  - **Runtime** - settings for the execution, diagnostics, and activation commands
  - **Modules** - configuration UI for all modules
- **Data Explorer** - Integrated tool for data discovery and tests
- **Track Changes** - built version control system
