Machinery and OEM

Machinery & OEM Embedded HMI and Machine Control

FrameworX enables OEMs to create flexible, customizable HMI solutions with IP protection and multi-customer deployment capabilities.

Key Capabilities

- MachineHMI for embedded deployment
- Template-based customization
- Multi-language support
- IP protection and licensing
- WebAssembly for any device
- iOS QR-code scanning for machine-specific display routing (10.1.5)
- MongoDB Historian as a lightweight embedded historian option for OEM appliance deployments (10.1.5)

Common Applications

- Packaging machines
- Injection molding
- Test equipment
- Assembly machines
- Material handling systems

Use Cases

- Laser Marking Systems Case Study
- OEM Production Lines Case Study
- Packaging Machines Case Study
