Keyboard Shortcuts Reference

Boost productivity with Designer shortcuts.

Keyboard Shortcuts (Reference): Keyboard shortcuts available in the Designer environment for efficient navigation and editing.

Designer Generic Shortcuts
Display Drawing Shortcuts
Code Editor Shortcuts
Navigation Shortcuts
DataGrid Shortcuts
Search and Replace
Window Management
Build and Debug

Designer Generic Shortcuts

Available throughout the Designer environment:

Key	Action
Ctrl+Z	Undo
Ctrl+Y	Redo
Ctrl+X	Cut
Ctrl+C	Copy
Ctrl+V	Paste
Delete	Delete
Ctrl+F	Find
Ctrl+O	Open current window as new window
F1	Help
Ctrl+S	Save. From FrameworX 10.1.6, Ctrl+S also saves the active document when the cursor is inside a document editor, such as the Code Editor or the display editor.
Ctrl+N	New
Ctrl+A	Select All
Esc	Available from FrameworX 10.1.6. Cancels the active dialog and closes dropdown lists, pickers and auto-complete suggestions. When a window has unsaved changes, the save confirmation still appears, so Esc never discards unsaved work. Esc does not close document editors. This applies to the Designer only. The runtime clients are unchanged.

Display Drawing Shortcuts

Specific to the Draw environment:

Key	Action
Ctrl + Click	Add or remove from selection
Ctrl+D	Duplicate selected elements
Arrow Keys	Move selected elements
Shift + Arrow Keys	Resize selected element
Tab	Select next element
Shift + Tab	Select previous element

Shift + Resize	Proportional resize (maintains aspect ratio)
Ctrl + Resize	Resize group contents (updates internal elements)
Ctrl + Mouse Wheel	Zoom in/out of canvas. The editor switches to the Pan tool, and a right-click returns to the Select tool. From FrameworX 10.1.6, zooming with the mouse wheel or the zoom slider is smoother on large displays.
Ctrl+W	Open document preview window

Code Editor Shortcuts

Available in the script Code Editor (C# and VB.NET) from FrameworX 10.1.6:

Key	Action
Ctrl + Click	Go to Definition. Jumps to the definition of the clicked class, method or namespace member. While you hold Ctrl, the symbol under the pointer is underlined as a link.
Tab	Inserts a tag found by name in the tag autocomplete list.
Arrow Keys, then Enter	Selects a tag found by name in the tag autocomplete list and inserts it. A period, a space or a semicolon does not insert a tag found by name.

See Code Editor Reference for tag autocomplete details.

Navigation Shortcuts

Key	Action
Alt+H	Go to Home
Alt+T	Go to Tags (Unified Namespace)
Alt+D	Go to Draw
Alt+R	Go to Runtime
Alt+Left	Navigate back
Alt+Right	Navigate forward
Alt+Down	Show navigation history

DataGrid Shortcuts

Key	Action
Enter	Edit cell
Escape	Cancel edit
Tab	Next cell
Shift+Tab	Previous cell
Ctrl+Enter	Commit and stay
F2	Edit mode

Search and Replace

Key	Action

Ctrl+F	Find
Ctrl+H	Replace
F3	Find next
Shift+F3	Find previous
Ctrl+Shift+F	Find in solution

Window Management

Key	Action
Ctrl+Tab	Next document
Ctrl+Shift+Tab	Previous document
Ctrl+W	Close document
Ctrl+Shift+W	Close all documents
Alt+W	Window menu

Build and Debug

Key	Action
F5	Start/Test Mode
Shift+F5	Stop
Ctrl+Shift+B	Build solution
F6	Build current
