Data Persistence Settings

Note: Modification of Auto-Delete requires Administrator privileges. Login at Designer Home with Administrator credentials to change settings.

Auto-Delete Options

Setting	Behavior	Use Case
Previous Sessions	Delete records from prior Designer sessions	Development cleanup
After Build Command	Delete records from previous builds	Build-based tracking
After Publish Command	Delete records from previous publishes	Production releases
Keep All Changes	Disable auto-delete (manual only)	Full audit trail
Tracking Changes Disabled	Stop adding new records	Performance/privacy

Manual Deletion

With Administrator privileges:

1. Select rows (Shift-Click or Ctrl-Click for multiple)
2. Right-click selected rows
3. Choose "Delete Selected Rows"

Table Columns

Default Visible Columns

Column	Description
Build*	Build number reference
TableType*	Database table type (UnsTags, AlarmItems, etc.)
RowState*	Current database row state
ChangedObject*	Part of object changed
UserName*	User who made change
Notes*	Additional change information

Additional Columns

Column	Description
ID	Unique change identifier
VersionID	Object version

ObjectName	Changed object name
ObjID	Object instance reference
UserID	User identifier
UserComputer	Computer used
DateCreated	Object creation date
DateModified	Last modification date

*Columns marked with * are displayed by default

Navigation

Double-click any row to navigate directly to that configuration in Designer.

Best Practices Checklist

Retention Policy

- Development: Use "Previous Sessions" for cleanup
- Testing: Use "After Build Command"
- Production: Use "Keep All Changes" for compliance
- Performance: Review and clean periodically

Audit Requirements

- Enable "Keep All Changes" for regulated industries
- Export regularly for long-term storage
- Document deletion reasons when manual cleanup

Use Cases

Scenario	Setting	Benefit
Active Development	Previous Sessions	Clean workspace
Test Environment	After Build	Build-based history
Production	Keep All	Complete audit
Large Solutions	Manual cleanup	Performance control
