

# Demo Projects

## Introduction

Four new demo projects are included in the download of our 9.2 release. These demos are free for you to use and learn from.

## Free Trial

We offer a FREE TRIAL that has the following:

- 2 hours of resettable runtime
- Multiple demo projects to use, review, and learn from
- 500 communication points
- Access to all the features in FactoryStudio 9.2 powered by FrameworX
- Access to all our standard communication protocols
- MQTT Broker
- OPC Server

**PLEASE NOTE:** The Runtime will run for two hours. You will need to restart it during your 30-day evaluation period.

The Engineering Environment will be enabled for projects to be edited for 30 days with no time restrictions. After the 30-day evaluation period, your project will open but with limited access to the entire project. Project Information access will be granted.

The Runtime will not run after 30 days. If an additional access license is needed, please contact: [Dave Hellyer](#).

You can download the **FactoryStudio** demo by filling out the form [here](#). You can see the highlights of each of our demo projects on our [website](#).
